Beckers SDI Labeling Specifications

Barcode

1. Symbology: QR Code
2. Dimensions: 2.5" x 2.5"
3. Contents: (each section is comma delimited, so commas are not allowed in the content data)
   a. Product Code (confirm exact code format with SDI, may require trimming of suffixes)
      i. Format: Text (no commas)
      ii. No minimum or maximum characters required
      iii. Example: ABC-3666
      iv. Supplier Specific Note: Beckers specific format for stock code will only include the first section of the code before the hyphens. 657B1161-11-D will be transmitted as 657B1161
   b. Batch Number
      i. Format: Text (no commas)
      ii. No minimum or maximum characters required
      iii. Example: 2103-12365A
   c. Container ID - Must be a unique id for each drum (serial number)
      i. Format: Text (no commas) Sample format is AB********
         1. "A" represents SDI's Identifier for the Supplier
            a. Supplier Specific Note: Beckers supplier identifier is hard coded as E on all labels
         2. "B" represents SDI's Identifier for SDI locations
            a. B = Butler, IN
            b. C = Columbus, MS
            c. H = Heartland, IN
            d. J = Jeffersonville, IN
            e. S = Sinton, TX
         3. * represents text characters for the serial number
      ii. No minimum or maximum characters required
      iii. Optional need: Number the drums as they come off the production line in the order that they are filled.
      iv. Example: BB40000105
   d. Container Volume
      i. Unit of Measure is Gallons
      ii. Format: Integer (no commas)
      iii. Example: 55
   e. Expiration Date:
      i. Format: mm/dd/yyyy
      ii. Example: 04/30/2021

      f. SDI Purchase Order Number
- i. Format: text (no commas)
- ii. 9 characters
- iii. Example: 1234567AB

      g. Bill of Lading Number
- i. Format: text (no commas)
- ii. No minimum or maximum characters required
- iii. Sales Order Number
- iv. Example: 1618577PL

      h. Total number of gallons for the batch in the shipment
- i. Unit of Measure is Gallons
- ii. Format: Integer (no commas)
- iii. Example: 220 (Represents that 220 gallons of batch 2103-12365A are in this shipment, as there are four 55 gallon drums containing that batch)

4. Human Readable Section – positioned below the QR code, include titles and QR data
    a. Product Code
    b. Batch Number
    c. Container ID
    d. Container Volume
    e. Expiration Date
    f. SDI Purchase Order Number
    g. Bill of Lading Number
    h. Total of Batch Shipped

Label

1. White matte finish label
2. Black print
3. Cut dimensions: 4" x 6"
4. Application Zone
    a. Minimum distance from all other barcodes on the container
    b. 6" space around label after installation

Barcode Data Sample Results When Scanned

Sample Output: (Note that there are no spaces before or after commas.)

657B1161,2103-12365A,EB40000105,55,04/30/2021,1234567AB,1618577PL,220
